

AMENDMENT TO THE SPECIFICATION

Please replace paragraph [17] with the following:

- [17] The moveable portion 44 preferably is moved relative to the stationary portion ~~4642~~ using hydraulic pressure. A pressure source 50 provides pressure through a conduit 52 and an inlet port 54. The inlet port 54 preferably is controlled by a controller 56 to selectively control the amount of pressure provided to the hydraulic ram. The controller 56 preferably communicates with the pressure source 50 and a vehicle parking brake device 58. The controller 56 preferably controls the supply of pressure to the hydraulic ram responsive to actuation of the parking brake.
